Task submission and evaluation

At the end of the challenge on Day 2, your team need to submit the following outputs:

1. The “policy tool” solution
2. The policy brief (template in the Annex 6)
3. The AI usage summary sheet (template in the Annex 7)

You will present the “policy tool” during five-minute live presentation/demo in the second half of Day 2. Beforehand, it needs to be submitted **by 13:30 on Day 2** as a file (hmtl, pptx, png etc.) together with the policy brief in the given template, and AI usage summary to these two emails: **JRC-SI@ec.europa.eu** , **info@fari.brussels**

Your work will be evaluated by a jury of experts applying the following criteria equally:

Criterion	Question	Description
1. Evidence and soundness	Can we trust the analysis?	The main finding is backed by the data; flood exposure, impacts and uncertainty are read correctly; limits and data gaps are acknowledged; visuals do not overstate.
2. Policy usefulness	Could a public actor act on this?	Recommendations follow from the findings; they are specific, realistic and addressed to a named actor; it is clear what should happen next, for whom and why.
3. Clarity and communication	Is it one clear story?	The policy tool and the policy brief say the same thing; a non-specialist can follow them; questions get direct answers.
4. Responsible AI use	Was AI used well and openly?	The team can explain how it used AI and how it checked the output against the data, and knows where AI helped and where it fell short.
